G4 Instructor Kit

Intercom communication between Instructor and Trainees up to 1 mile / 1.6 km*

For the Perfect Riding Lesson...

The **scala rider G4 Instructor Kit** is designed especially for Motorcycle Driving Schools and offers a convenient Intercom communication solution for any motorcycle lesson. The Kit includes pre-paired headsets for Instructor and Trainee/s* for immediate Intercom use.

The scala rider G4 Instructor Kit contains one Instructor headset and is available with either one or two Trainee headsets.

The Instructor has three options for connecting to the Trainee:

In car: Using the Instructor's **G4** headset and *Bluetooth Speakerphone*. In this configuration, Instructor-Trainee Intercom range is up to 500m. If two trainees attend the lesson, bike to bike Intercom range between first and second trainees can reach up to 1.6km**.

On motorcycle: Using the **G4** headset attached to the helmet. The Instructor can choose to instruct Trainees from a motorcycle, with the **G4** headset attached to the Instructor's helmet clamp included in the kit.

Standing out-of-car: Using the **G4** headset attached to the special headphones included, the Instructor can step out of the car during the lesson maintaining contact with the Trainees.

When the system is used out of the car or from a motorcycle, the range between the Instructor and each Trainee can reach up to 1.6km**.

Both Instructor and Trainees enjoy superb audio quality throughout the lesson with Full Duplex Intercom communication - enabling users to speak and be heard at the same time.

AGC technology assures automatic volume adjustment according to riding speed and ambient noise, leaving both hands on the handlebars. This will ensure the Trainees' full and undivided attention on the road ahead, guided by the Instructor's reassuring voice throughout the driving lesson.

Bon Voyage!

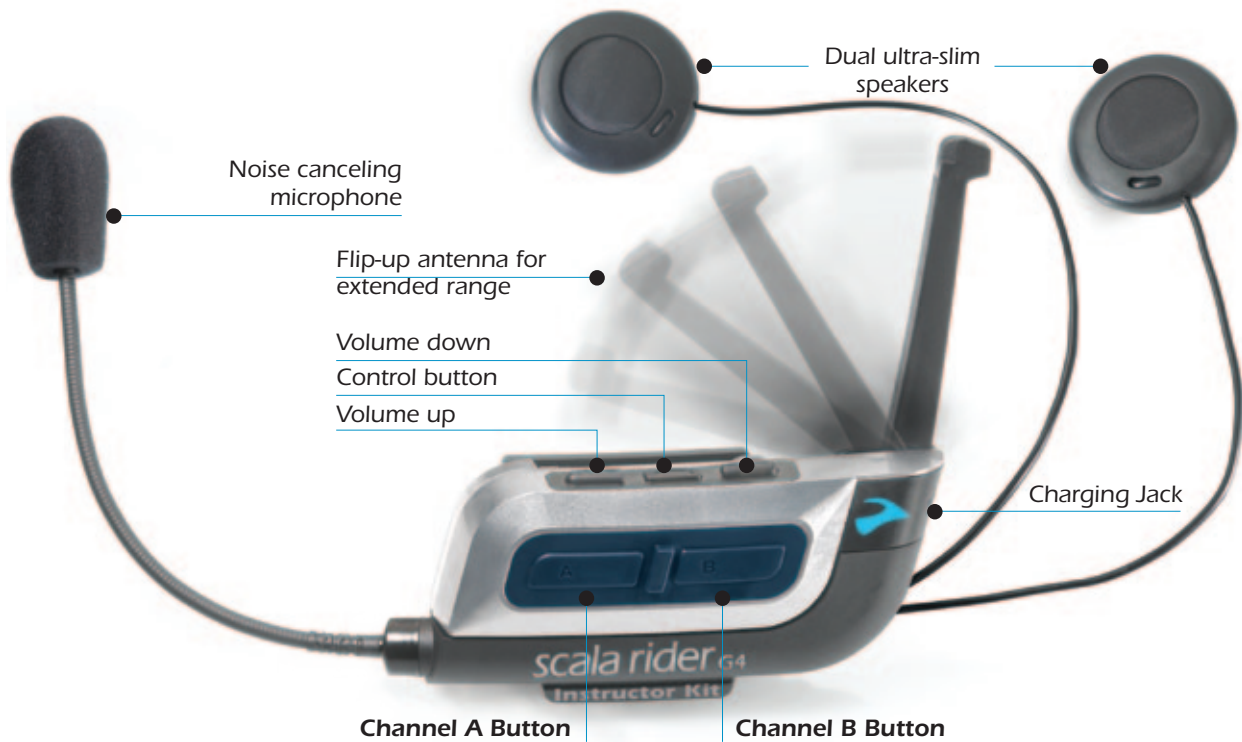

* The Kit is offered in two different versions – For Instructor and one trainee or with two trainees.

** in a straight line of vision and in open terrain.
