

Cardo Systems Ltd. - Quality Policy

Cardo Systems Ltd. considers the ongoing Quality Assurance and improvement of its products and services as one of its most essential commitments. The level of success in these areas is of critical impact on the company's overall business and on its future success.

- ✓ Cardo's quality procedures and processes are designed to ensure and maintain a high-quality level of its products and services. These efforts must always meet or exceed the expectations of our customers and remain in full compliance with all applicable legislative, statutory, regulatory and any other such requirements.
- ✓ Cardo's key success factors are:
 - Strong management focus on the end-customer and unrelenting commitment to the quality of its products and services.
 - Full engagement and professionalism by all company employees.
 - Relentless efforts to preserve and gain customers satisfaction.
- ✓ The company's human and material resources will at all times remain focused on improving its quality related systems, processes, products and services. All stakeholders must remain aware that these are essential preconditions to retain and strengthen the company's position as a world leader in its market. Among others, this objective requires the following:
 - To remain committed to using state-of-the-art technologies and cooperate with best-of-class business partners in the industry.
 - To constantly monitor our management systems and their objectives and to remain willing and ready to replace established patterns in favor of better and improved solutions.
- ✓ The Quality Policy is available to all Cardo employees, business partners, customers, and any other interested parties, as well as to all the people working for the company or on its behalf, including contractors, consultants, suppliers and others.
